WORK EXPERIENCE

MobyMax

March 2019 - Present

Senior Software Enginner

MobyMax is the leading education platform in USA, and Over 23 million users currently use it, I joined MobyMax as a contractor web developer to help the existing team improve current features and build new ones.

Opportunity Inc

January 2018 - Present

Senior Software Enginner

Opportunity is a social network that connects professionals, during my work period in Opportunity I was and still the main developer responsible for developing the mobile application and the whole Mobile experience.

AllStar

December 2015 - September 2016

Senior Software Enginner

AllStar is a worldwide company based in Egypt selling ERPs. My role as a Senior Software Engineer was building the core system with great, complex features using **Yii Framework**.

Bareeq technology

Senior Software Engineer

March 2015 - December 2015

I was the lead developer in all the projects using different tools such as WordPress, Yii, and AngularJs.

Freelancer

Aug 2012 - Present

Full Stack Developer

For more than 4 years I managed to build a lot of sites working on my own or cooperating with other freelancers. I 've also managed remote teams and always delivered on Time. Being a freelancer taught me a lot about self-discipline and commitment.

QUALIFICATIONS

- 6+ years of experience working in the web field.
- Hard worker, quick learner, and ability to assume responsibility.

EDUCATION

B.Eng Computer Engineering

Sept 2011 - September 2016

Damascus University

I've graduated from Damascus University in July 2016 during my 5 years of study I learned from college writing complex but clear codes with an eye on performance, I've also studied Machine Learning, artificial intelligence, Image processing, MicroControllers(Hardware) and a little of IoT
